Functions

HLOOKUP function finds the col in range that has a first row cell similar to value. If approximate is not true it finds the col with an exact equivalence. If approximate is true, then the values must be sorted in order of ascending value for correct function; in this case it finds the col with value less than value it returns the value in the col found at a 1-based offset in row rows into the range. as_index returns the 0-based offset that matched rather than the value.

System Message History

You have no system message.

Remove Spreadsheet %1

%1 is shared to you by %2, are you sure you want to remove it from your workspace?

Your Tags on "%1"

separate by comma

All Your Tags

Transfer "%1" to another user

If you transfer your spreadsheet to another user, the spreadsheet will not belong to you anymore.

The new owner will have the full control on this spreadsheet, e.g.

You can set yourself to be one of the sharing user(s) of this

New Owner

Specify the new owner of this spreadsheet

Add me to the sharing user list.

%1 has been transferred to %2.

Auto Fit Selection

Strike, Ctrl+5

Password-Protected Spreadsheet (leave username blank)

Parameters saved.

Spreadsheet name is not provided.

owned by %1

Sorry! The browser you are now using is not fully supported in

You can set the default searching scope of Finder here.

By default, find in

Want to disable the warning box that appears when you're pasting? You can configure the settings in Grid View here.

Email Settings

Please remember your password.

You can configure the default settings of your spreadsheets here.

You can set the default sorting order of the spreadsheets in your workspace.
